

ABOUT US.

For many years we have been continuously working on new developments, especially in the field of IP67 / 68 outdoor lighting.

Our service – your product!

OUR PORTFOLIO

-  Inventor of the first homogeneous bendable light line
-  Evaluation & Development of Chemical Components for LED Lights (Resins, Thermoplastics)
-  Planning of casting machines and processes for handling
-  Staff training for sales, production and development
-  Intermediate goods (Extrusion, injection moulding, 3D Printing)

Trust our knowledge and experience.

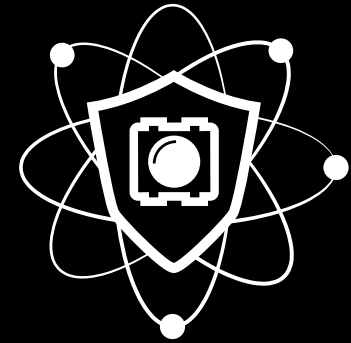

We find the best solution for your lighting product.
